

VETERAN MOVER OR BEGINNER, every structural mover should want a copy of this publication

In 2006 two well-known members of IASM and highly respected movers, Larry Cline of West Coast Structural Enterprises, Inc., Myakka City, FL and Tommy Doyle of Flint and Doyle Structural Movers, Fort Myers, FL, were asked to make a presentation to attendees of the IASM annual conference in Columbia, SC. The presentation title was Structural Moving 101. Because of extreme interest in the session, Cline and Doyle were asked to expand on the title at the 2007 conference in Tucson, AZ. IASM has produced a 28-page document of that presentation.

There is no other document available on the market so pertinent to the industry. It covers such items as definitions, center of gravity, hydraulic system diagnosis and calibration, physical concept and their mathematical relationships, and measured turns. The booklet contains examples, charts, graphs and diagrams.

This is a "must" publication for every structural moving company. Regardless if you are a veteran mover or a new employee to the industry, this information explains essential principles every mover must know. **Order yours today.**
