

Heaviest Structure Moved On Rubber-Tired Dollies

Thomas F. Doyle, III

Flint & Doyle Structural Movers, Inc.

Ft. Myers, Florida

SMR Aggregate's Office Building

Due to a planned major roadway extension, the 80' x 96' 7,136 square foot structure weighing 586 tons had to be relocated. The two miles move was accomplished in two weeks during continuous rain (160 recorded inches) using six power and nine regular dollies, all off road, on steel plates. **SM**
