

2005 AWARDS COMPETITION WINNER

Longest Structure Moved Under \$30,000

Blackwell Building Movers

Armstrong, British Columbia, Canada

Murray Blackwell

The Newnes Magee Warehouse, Salmon Arm, BC, Canada

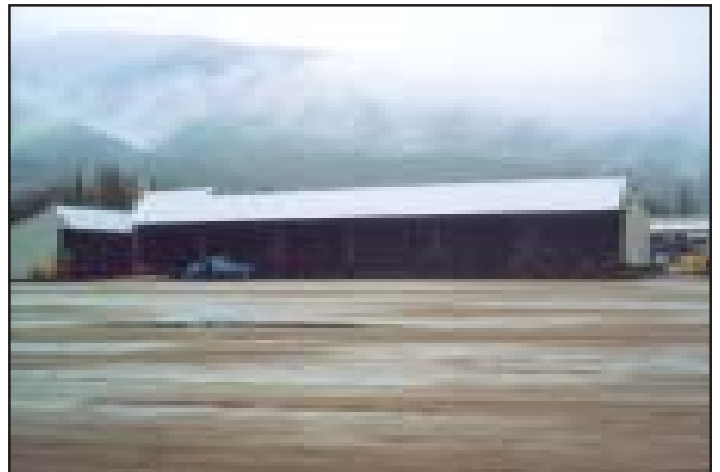

This building, posts and timber trusses, with seven steel uprights on the front, was backed 500 ft, turned 90 degrees and pulled along side a wall before being rolled into place on a three foot foundation. The structure was 156' L x 32' W, with an "L" extension 40' x 24' on the north end. Main beams were sectioned; cross loaded and moved on eight dollies, four in groups at each end. The work area was fairly flat where a three-man crew completed the project in 6.5 day, all in the rain. 

The structure had seven steel uprights on the front.

A "L" extension was 40' x 24'.

Overall length was 156' and 32' wide.
