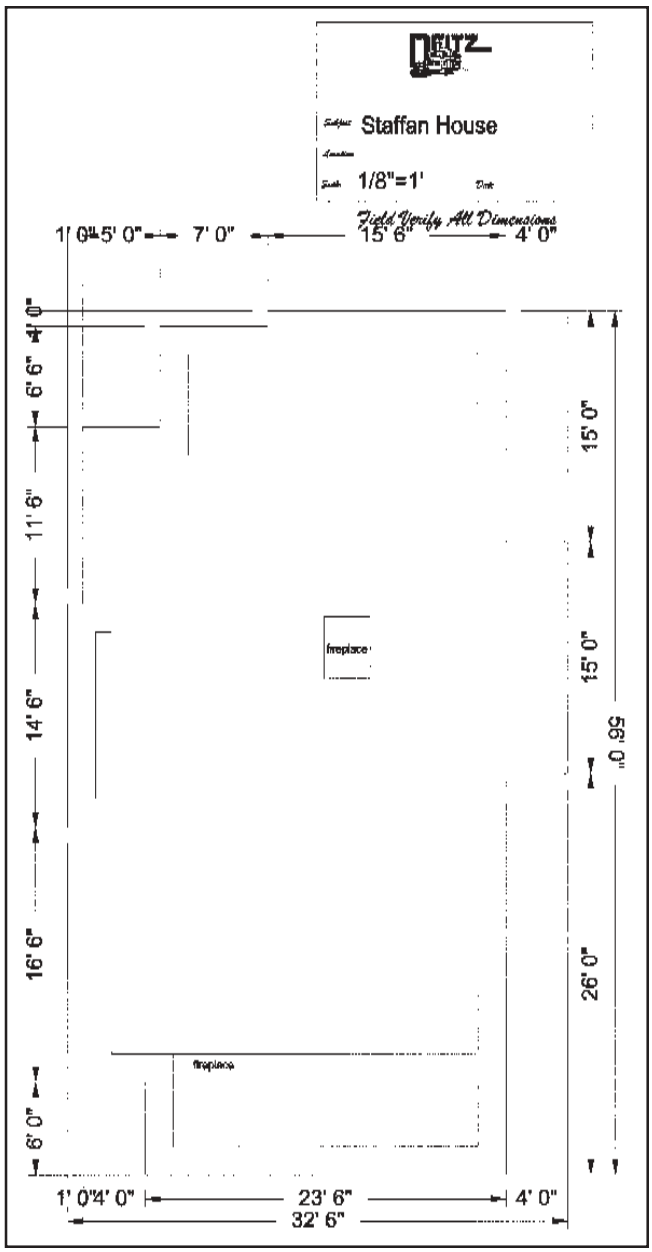
2005 AWARDS COMPETITION WINNER

Heaviest Structure Moved
Under $30,000

Daniel Deitz

Deitz House Moving Engineers, Inc.
Muskegon, Michigan

Staffan House


This 32' x 56' two-story Victorian style frame house weighing 130 tons was constructed in 1929 featuring double level fireplaces in two locations. The construction of a public library required relocation of the Staffan House. Deitz engineers moved the building on 100' beams by pushing with hydraulic cylinders on Hevi-Haul skates. SM
