

The original two structures being moved on False Creek Bay

Nickel's Recycles Three Times...One To Go

The British Columbia Company Knows Recycling

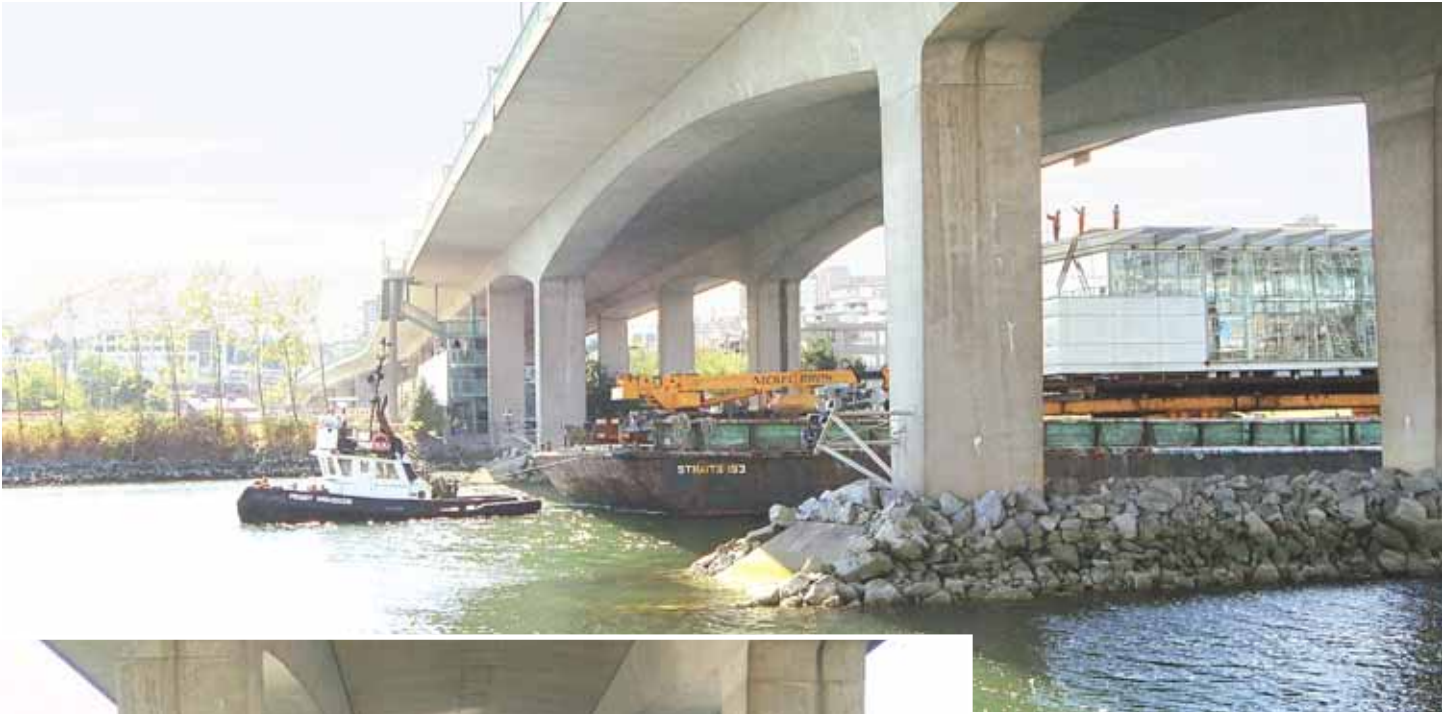

On their website, Concord Pacific states they are Canada's leading developer of master planned communities. It is an impressive website detailing the many developments sprinkled throughout the area surrounding Vancouver, British Columbia, home to their corporate offices. The company's legacy as a master-planned community developer began with Concord Pacific Place on the Expo '86 grounds on Vancouver's False Creek waterfront. This project has steadily transformed the city's skyline and redefined urban living. To date, Concord Pacific Place includes more than 10,000 homes, intermixed with parks, schools and a variety of retail and commercial services.

IASM member Nickel Bros House Moving, Ltd., located in Port Coquitlam, BC, Canada has been involved with the development of the project from its inception. In 1996, working with Chris Gilliam of Concord Pacific, Murray Nickel, President, made the first of three moves of two Presentation Centre buildings to

Steve Elliott, Gray Project Management, left, with Nickel Bros. President Murray Nickel at the end of a successful move.

(Above)
Passing under Cambie Street Bridge in Vancouver, British Columbia, Canada.

(left) Passage under the bridge was made possible by waiting for low tide.

(Below) Later the same day, the structures were off loaded at the end of False Creek by waiting approximately six hours for a high tide.
