

BLACK JACK CRIB JACKS

- Fifteen ton capacity at 6000 PSI maximum operating pressure
- Tested to 100,000 strokes and 24,000 PSI
- Spring-return models only, with the strongest return spring available
- Will withstand full extension without damage to the top bushing
- Heat-treated external and internal steel surfaces provide superior wear resistance
- "POWER TECH™" surface treatment applied outside and inside the cylinder improves the surface hardness and provides better resistance to corrosion, wear and impact damage than chrome plating
- Removable threaded bottom plug allows for simple and easy cylinder cleanout, disassembly, and re-assembly
- Induction hardened and hard chrome-plated piston provides superior strength and rust resistance
- Tapered grooves for easy handling in jack bases
- Supplied with, and fully compatible with, Modern Hydraulics jack components such as screw tops, couplings, side pipes, and jack bases

BLACK JACKS are available in two sizes:

The standard jack is 25" tall, has a 17" stroke, and weighs 55 pounds.

The short jack is 16" tall, has a 9" stroke, and weighs 40 pounds.

The high quality aluminum alloy jack base weighs 35 pounds.

POWER YOUR BLACK JACKS WITH OUR POWER PACKED POWER PACKS!

This is our smallest, best selling model

- 5 gallon usable capacity (20 crib jacks!)
- 6 gallon maximum capacity
- 5.5 HP Honda engine
