

Big changes are coming to **MODERN HYDRAULICS**

In 2006!

After 50 years of dedicated service to the structural moving industry my father, Robin Renshaw, founder and owner of Modern Hydraulics, Inc., is retiring and closing the business effective on or around the end of December, 2005.

However, the tradition of excellence in design, manufacturing, service and support of equipment for the structural moving industry will continue as myself and my partners, David Altepeter and Janett King, all current employees of Modern Hydraulics, Inc., are opening Modern Hydraulics L.L.C.

Modern Hydraulics L.L.C. will provide parts, service and support for existing Modern Hydraulics, Inc.-built equipment, as well as designing, manufacturing, selling and servicing its own line of equipment for the structural moving and automotive industries.

We are very excited at the opportunity to serve existing Modern Hydraulics, Inc. customers as well as making many new customers, and designing and selling our own new designs of hydraulic equipment for the structural moving industry.

We will be attending the TASM, IASM and Mid-States conventions and conferences in 2006 and we hope to see you there.

Lance H. Renshaw
Vice President, Modern Hydraulics, Inc.
President, Modern Hydraulics, L.L.C.
