

International Association of Structural Movers

2006 Awards Competition—Criteria & Rules

Award Applicant Criteria

1. The mover must have been a regular member in good standing during the year the job was performed and the year in which he is applying for the award, or have just retired since completing the job. The Awards Committee will check status against the current membership list.
2. The project must have been completed by December 31 of the year in which the competition is judged.
3. Retired movers are not eligible for awards except in the **Honor** category unless they retired in the year of application.
4. Members are only eligible for one award per company except: they may win one **Honor** category award *and* one award in the **Open** categories *or* the **Under \$30,000** categories.
5. Members may submit a project in more than one category. ***A duplicate application and duplicate photographs must be submitted for each category.***
6. At the discretion of the judges, award applications may be moved to categories other than the category for which they were submitted.

Award Category Explanations

1. There are three basic categories of awards:
Open Under \$30,000 Honor
2. The **Longest, Widest, Tallest, Heaviest Structure Moved** and **Heaviest Structure Moved on Dollies** categories are judged strictly by the numbers (i.e. the Longest Structure qualifying in the Longest category wins).
3. The **Structure Moved the Greatest Distance on Land** may not include barge or rail travel as part of the total distance traveled. However, if a structure has been moved by rail or barge, the total excluding that amount is still eligible for this award.
4. The **Heaviest Building Moved** and the **Heaviest Building Moved On Dollies** are discretionary categories and may be deleted at the discretion of the judges. These categories were created in case a ship, bridge, barge, or structure other than a building wins the **Heaviest Structure Moved Award**, potentially slighting a noteworthy building.
5. The **Structure Moved with the Most Square Footage on One Floor** may not be a combination of loads.
6. **Most Innovative Move Award.** Judges will look for innovation in method, equipment, or out-of-the-ordinary methods for solving unique problems.
7. **Best Time Saving Device Award.** The judges will look for a time/labor saving device which is unique and original.
8. **Judges Award.** This category is designed to honor the structural moving job which the judges consider either the best looking, best engineered, or most noteworthy job of the year. At the discretion of the judges, a job from another category may be placed into this category. It may have received an award in another category. If no entry is deemed worthy, the judges may choose not to make an award.
9. **Good Samaritan Award.** This award is presented to a member for assisting a fellow member and the industry without receiving personal benefit.
