

# “Just the facts” about the “Black Jack”

Call 800-742-7935 for prices and availability.

What makes this the world’s best crib jack? Check the facts!

You don’t buy a crib jack to use it once. You don’t buy a crib jack because it’s cheap. You buy a crib jack to use it for decades. So why buy an inferior jack?

There’s only one crib jack that will withstand full extension at 6000 psi without collapsing the top bushing and seizing the piston. Only one crib jack that’s been tested to 100,000 strokes and 24,000 psi. Only one crib jack that has a heat-treated cylinder for extra strength and resistance to impact damage. Only one crib jack that has an interior surface treatment that’s superior to chrome for rust, wear, and corrosion resistance, and that will never flake off.

There’s only one crib jack that you can totally disassemble and reassemble without any special tools in a few minutes. Only one crib jack that has a removable bottom plug that allows you to totally clean out the cylinder when you replace the piston seal.

There’s only one crib jack that has almost 50 years of experience behind its design and construction. Only one crib jack with the design and manufacturing expertise of SPX-Power Team behind it. Only one crib jack with the experience and reputation of Modern Hydraulics behind it. Only one crib jack that’s compatible with Modern Hydraulics components such as screw tops, couplings, side pipes and jack bases.

Combine those features with a redesigned base with larger carrying handles and tapered grooves for easy locking in the jack bases, and there’s no doubt about the quality and value of this jack.

**BLACK JACKS** are available in two sizes, 25” tall/17” stroke/55 pounds, and 16” tall/9” stroke/40 pounds. The high strength aluminum alloy base weighs 35 pounds.
