Modern Hydraulics/Nevada LLC

New for 2009

A major innovation:

Remote Jacking Control

One person can operate a Unified™ Jacking machine from up to 200 feet away via this rugged, bright touch screen

Hydraulic pressures and main unit location are displayed on bar graphs

Instructions for every operation and situation appear on the screen

Can be retro-fitted to existing machines

Improve your productivity with our new technology!

A new product:

Our smallest Unified™ Jacking System

Our new 4-jack machine is exactly what you have been asking for

Fits in a short bed pickup truck
Measures just 5 feet by 3-1/2 feet

Light enough to be picked up by a skid steer loader

Another major innovation:

Wireless remote control for Power Packs!

This optional wireless control replaces the master control valve and needle valves on our Power Packs

Enjoy full control of your Power Pack from up to 200 feet from the machine

Cord for operation in case the remote's batteries become discharged

Only from **MODERN** Hydraulics!
