

New Ideas and Products for 2010!

Remote controls

A major innovation and an industry first!

Corded remote controls for Unified™ Jacking Systems!

One person control of every operation of the machine from up to 200' away

Follow the instructions on the screen or operate the machine manually

Improve your productivity and safety

Install on your existing machine during remanufacturing

Wireless remote controls for Power Packs!

One person control of each operation of a Power Pack up to 200' from the machine

Control the speed of three zones independently of each other

Control and vary the overall speed of the jacking operation

Modular Unified Jacking Machines

Purchase a 4 Jack Unified™ Jacking machine now, return it to Modern Hydraulics to have it expanded into a larger machine!

Turn this 4 Jack Unified™ Jacking System...

With our new modular main unit design, you can buy a small Unified™ jacking machine now and upgrade to a larger machine in the future, **without** having to sell your existing machine and buy a new one.

We take the modular main unit from your small machine and add modules to make it into a larger machine. Go from 4 or 6 jacks to 10 or 16 jacks or more! Saving money by reusing your existing engine, pump and control system, we expand your machine with a new modular gauge panel and extra outlet connection manifolds and a larger house reel.

...into this 9 Jack (or larger) Unified™ Jacking System!
